Instructor Feedback

The student did very well during this lesson and demonstrated strong overall driving skills. Continued focus should be placed on speed control to further improve consistency and safety.

How the Electronic Student Evaluation Works

After each behind-the-wheel lesson, the instructor completes this electronic evaluation using our standardized driving checklist. The evaluation clearly documents skills practiced, performance levels, and recommended next steps.

Results are emailed to the student and parent/guardian after the lesson so families can review progress at any time.
